why do we do this?

the solutions depend on the questions...

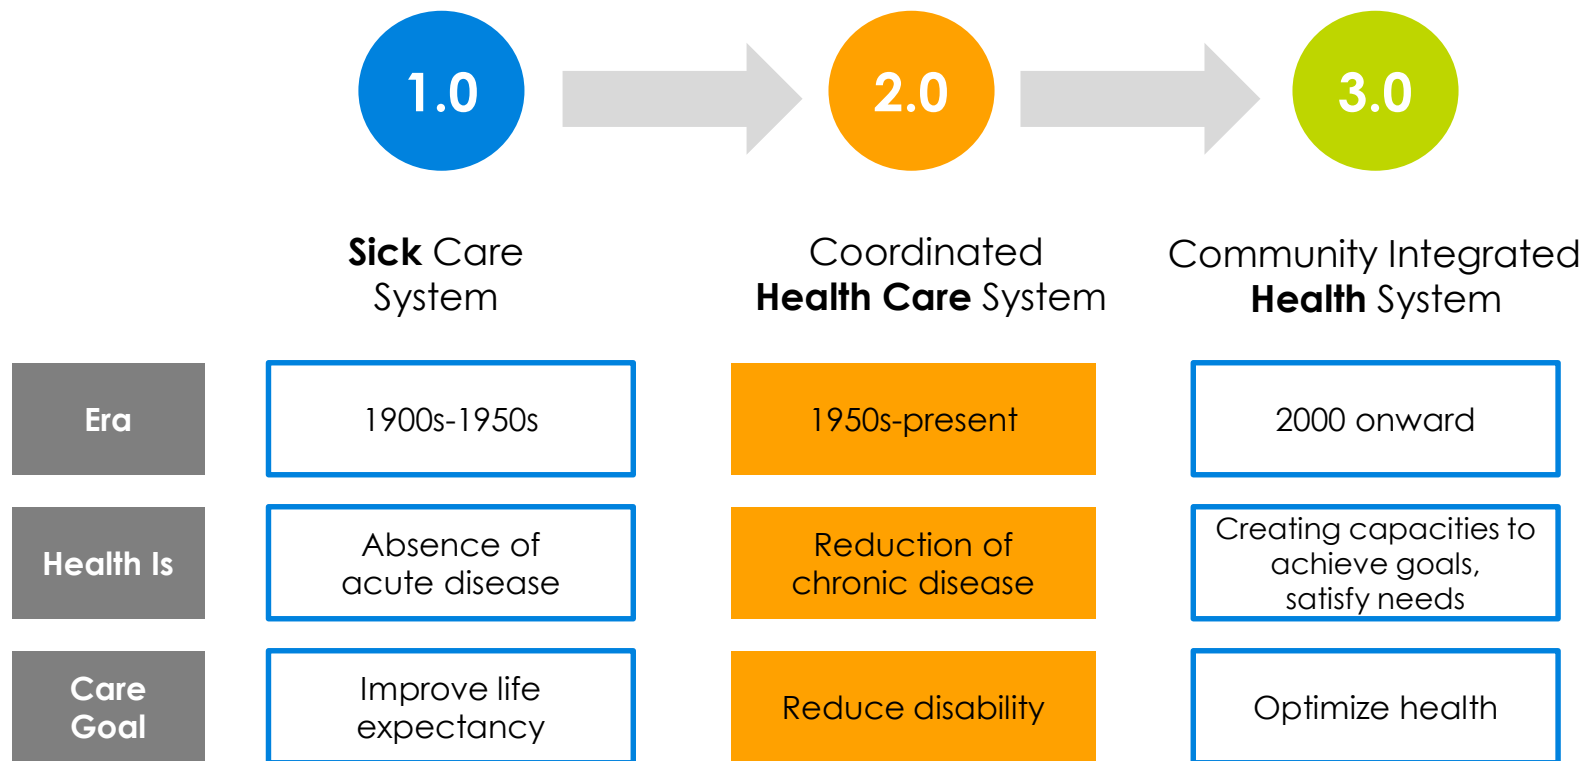

Senate GOP (S 2330);
House-passed GOP(HR 4250);
Democrats (S 1890; HR 3605)

where are we now?

U.S. Health Delivery System Transformation Path

Halfon et al., 2014

health transformation framework

SYSTEM DESIGN	Health service providers, operating separately	Team-based care within health	Community integrated services, health care as one component
CARE MODEL	Little coordination between in/out patient care, episodic treatment	Chronic condition management, patient-centered care coordination	Health, psychosocial, and wellness care integrated across the life course
DOMINANT PAYMENT APPROACH	Fee-for-service	Value-based health payments	Population-based global budgets, linked to multi-sector financial impact
APPROACH TO QUALITY	Variable, low transparency	Consistent, standardize processes and outcomes	Continuous learning and quality improvement
BENEFICIARY LENS	Individual	Patient and family	Subpopulations and communities, equity-oriented

Halfon et al., 2014. Adapted from Figure 2.

uninsured rate has been declining for children in recent years

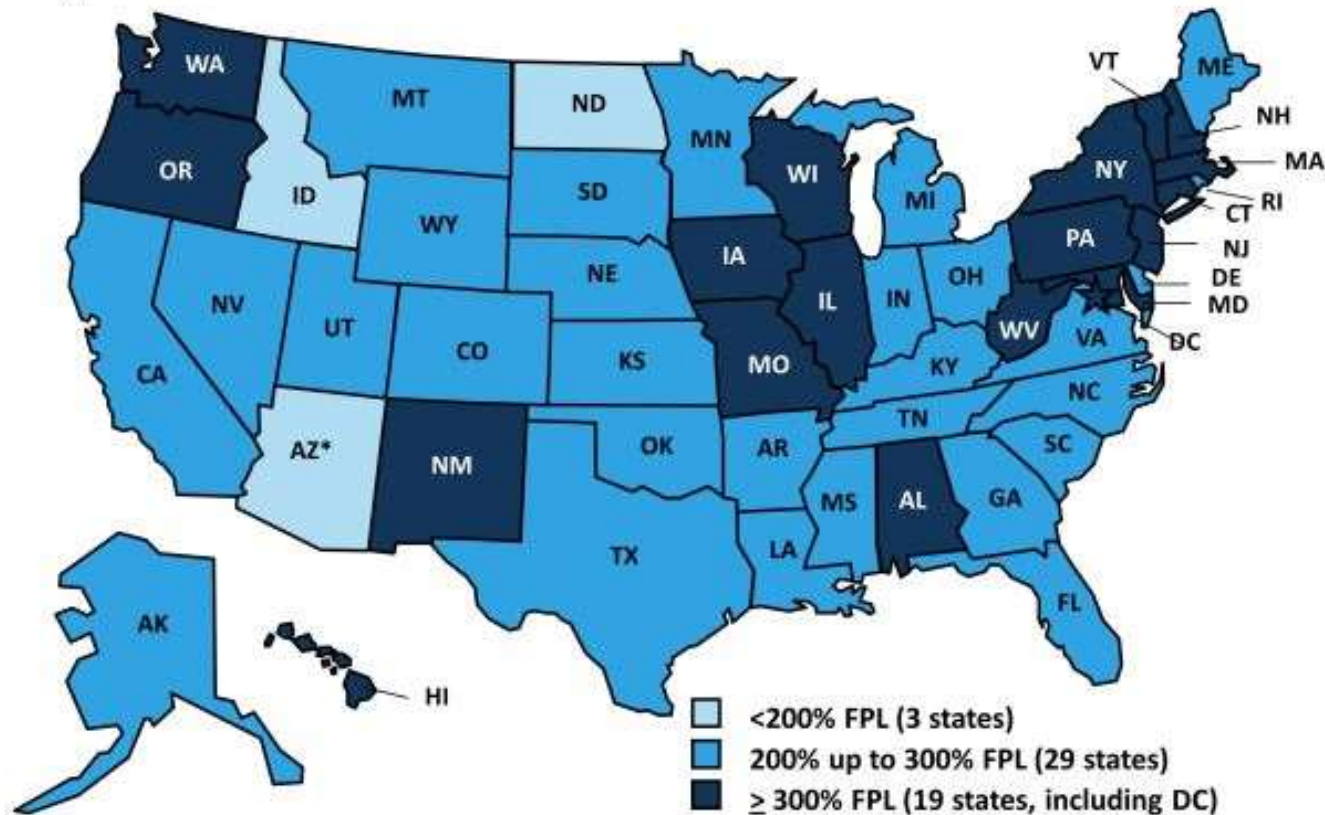

Uninsured Rates Among Nonelderly Adults and Children, 1997-2012

KFF, KCMU analysis of NHIS data, March 2014

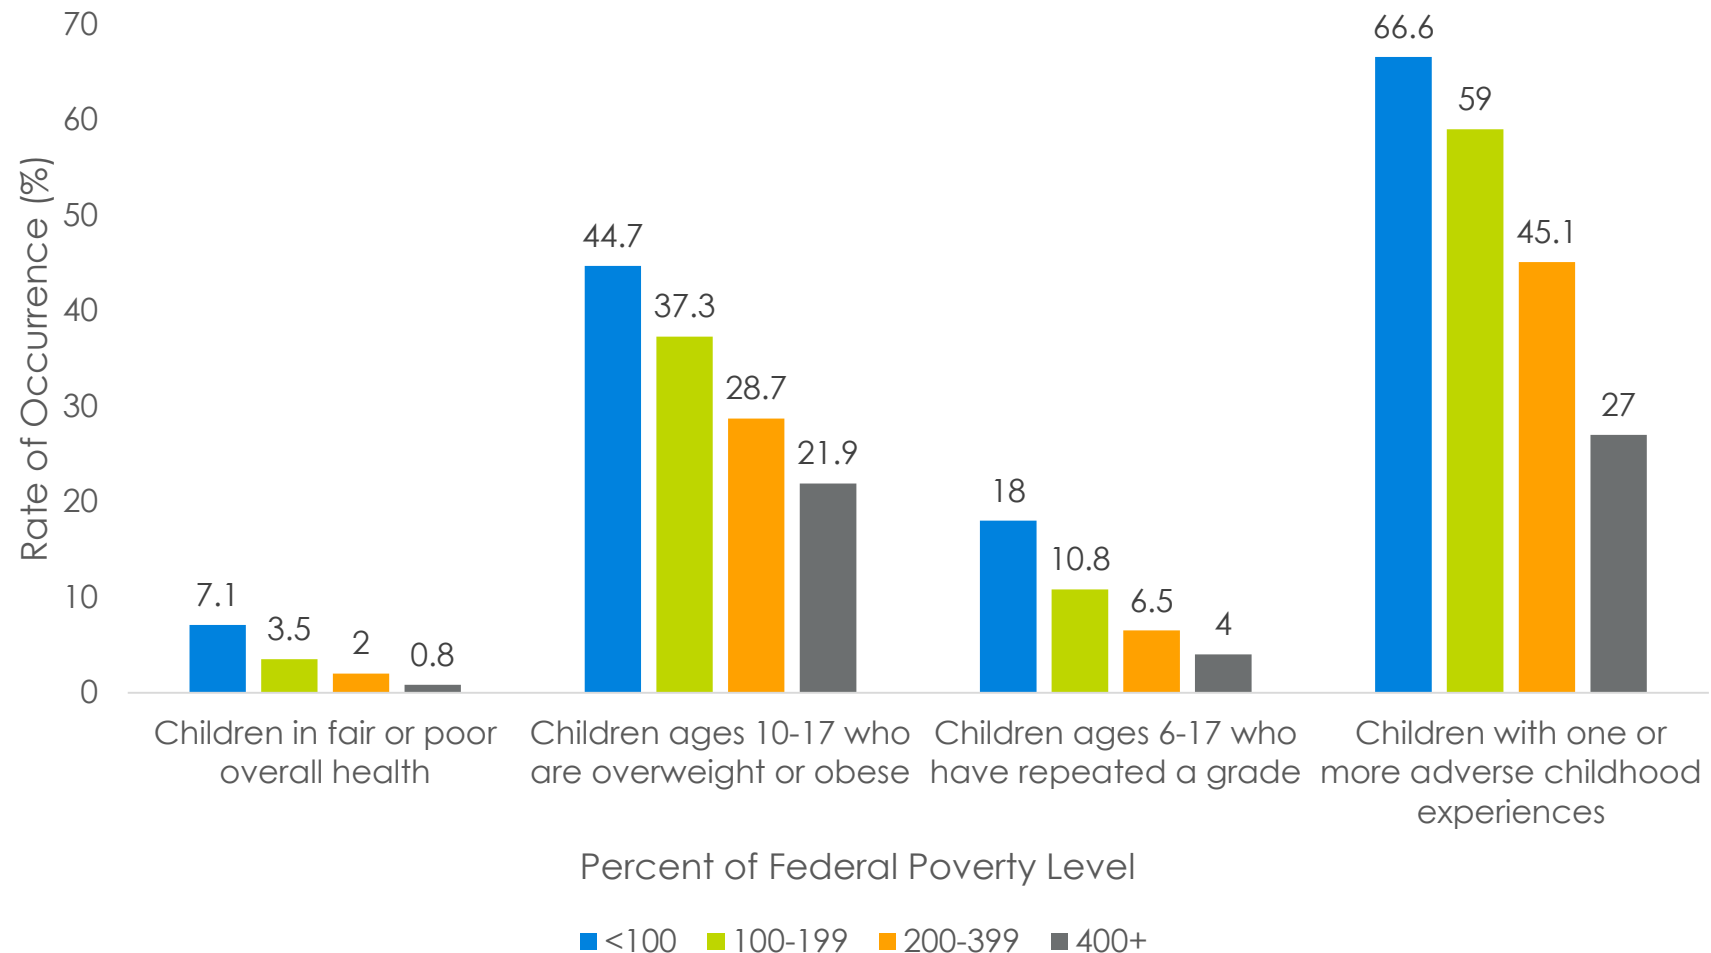

but coverage disparities still exist

what would health 3.0
look like in our communities?

INVEST IN YOUR COMMUNITY

4 Considerations to Improve Health & Well-Being *for All*

WHAT

Know What Affects Health

WHERE

Focus on Areas of Greatest Need

Your zip code can be more important than your genetic code. Profound health disparities exist depending on where you live.

WHO

Collaborate with Others to Maximize Efforts

HOW

Use a Balanced Portfolio of Interventions for Greatest Impact

- Action in one area may produce positive outcomes in another.
- Start by using interventions that work across all four action areas.
- Over time, increase investment in socioeconomic factors for the greatest impact on health and well-being for all.

Four ACTION Areas

unanswered questions

1. Who is included in the system and who is excluded?
2. What is the best organizational structure to address these issues?
3. How can you create the right policy environments to support Health 3.0?
4. How are the resources allocated among systems and within health system?
